

# BODY GLOVE

# SOLO

**Body Glove™ SOLO Inflatable Stand-Up Paddle Board**

**WARNINGS AND SAFETY PRECAUTIONS**

IMPORTANT, RETAIN FOR FUTURE REFERENCE : READ CAREFULLY

Use of this product exposes the user to unexpected risks, dangers and hazards.

\DISREGARDING INSTRUCTIONS AND SAFETY PRECAUTIONS IN THIS MANUAL OR ON THE PRODUCT MAY RESULT IN INJURY, INCLUDING THE POSSIBILITY OF DEATH.

**USER WARNINGS**

-   No protection against drowning
-   Swimmers only
-   Wear personal protective equipment
-   Proper inflation for this board is 15 PSI (1 Bar)
-   Always fully inflate the board to 15 PSI (1 Bar) before using
-   This board should not be used by children without adult supervision

- Restrict use of this product to individuals that are in good physical health and are capable of swimming.
- It is recommended that you wear a Coast Guard, or similar law enforcement authority, approved personal flotation device (PFD). NOTE: US Federal Law requires the use of a PFD on waters under its jurisdiction.
- When operating this product, you are assuming responsibility for your own safety and the safety of others around you. Always follow the regulations of your local nautical authority.
- Temperature changes and exposure to direct sunlight can affect the PSI (inflation pressure) of the platform. Check the pressure periodically to ensure that the PSI is within the target range.
- If you are under the age of 18, you must have a legal guardian read these warnings and safety precautions prior to use. Do not use this product without adult supervision.
- Do not use this product if you are under the influence of alcohol, drugs, or medications.

**IMPORTANT SAFETY RULES**

-   Please read the user guide prior to use
-   Maximum weight capacity (people and gear) is 145.2 kg / 320 lb
-   This board can be used by 1 adult and 1 child as long as the maximum weight does not exceed 145.2 kg / 320 lb
-   Always supervise children in the water  
Never leave children unattended
-   It is recommended that you stay within sight of the shoreline (300 m / 328 yds)

- Assembly required. For outdoor use only.
- If you will be using this product as a stand up paddle board, you must use a surf leash (included in the package). A loose board / paddle board in the water is extremely dangerous to you and everyone around you. Failure to use a surf leash may result in serious injury or death.
- Examine the surf leash after each use and replace it if you see any sign of wear.
- It is recommended that you use this product with an experienced partner when using this product.
- Never use this product beyond your skills and ability.
- Never deflate this product with a valve wrench.
- Keep this product clear of sharp and / or heat producing objects.

**PADDLING PRECAUTIONS**

-   Do not use board in white water
-   Do not use board in breaking waves
-   Do not use board in off shore wind
-   Do not use board in off shore current

- Always observe Coast Guard and local rules regarding water sports and watercraft.
- Never use this product in off shore or windy conditions. Using this product with wind more than 10 knots (18.5 km/h / 11.5 mph) may result in serious injury to yourself and others around you.
- Use caution when carrying this product. Carrying the platform in windy conditions may result in serious injury to yourself and others around you.
- Never use this product in lightning conditions.
- Never use this product in conditions that are beyond your ability.
- Never use this product near other boat traffic or watercraft.
- Never use this product after dark or in conditions with poor visibility.

**RELEASE OF LIABILITY, CLAIM WAIVER AND ASSUMPTION OF RISK AGREEMENT**

NOTICE TO CONSUMER OF TERMS OF OFFER TO SELL PRODUCT BEFORE USE: This Product is offered for sale subject to and in consideration of the unreserved acceptance by Consumer (that is you, the Buyer) to be bound by the Assumption of the Risk of use, Waiver of Liability and Indemnification/Hold Harmless of SURF 9, LLC, a licensee of Body Glove IP Holdings LP, its employees, agents, attorneys, officers, subcontractors, manufacturers, contained here below (the "Terms") in addition to the purchase price. Acceptance of the following Terms in addition to the purchase price is essential consideration and inducement for the sale and use of this Product. Should Consumer not wish to accept these Terms upon review, then please do not purchase this Product or if you have already purchased this Product, then please return it to the Retailer for a full refund of your purchase price for your rejection of these Terms - whether the Product has been opened or not. Use of this Product by Consumer shall be notice of Consumer's unreserved acceptance of these Terms. Thank you for your acceptance and please enjoy this Product safely.

THE "TERMS" YOU, THE CONSUMER (THE BUYER), UNRESERVEDLY ACCEPT PRIOR TO USE OF THE PRODUCT FOLLOW, SO PLEASE READ CAREFULLY:

WARNING ABOUT USE OF THIS PRODUCT AND ASSUMPTION OF RISK OF USE: Please be advised that the use of this Product is inherently hazardous, and you may be exposed to dangers and hazards, including some of the following: unpredictable ocean, river currents, lightning, hypothermia/heat exhaustion, drowning, death, falls, fractures, concussions, dangerous weather, overexertion, injuries from lack of fitness or conditioning, equipment failures, or failure to wear a personal flotation device or use other protective gear, and negligence of others. As a consequence of these risks, you may be seriously hurt or disabled or may die from the resulting injuries, and your property may also be damaged. THEREFORE, Consumer hereby freely ASSUMES the above-mentioned risks as well as other risks not listed that are may be part of use of this Product, and any harm, injury or loss that may occur to you or your property as a result of use of the Product.

**WAIVER AND RELEASE OF LIABILITY:**

By use of this Product the Consumer hereby agrees specifically and unreservedly to Waive, Release and promise not to sue for any and all claims, liabilities, causes of action and demands against SURF 9, LLC, a licensee of Body Glove IP Holdings LP, its employees, agents, attorneys, officers, subcontractors and manufacturers, that in any way arise from the use of this Product for injury, death, pain, loss or harm that may occur to Consumer, third parties or any personal property. This waiver and release shall include all claims for negligence, breach of contract or design defect, but shall not apply to gross negligence, wilful misconduct or other liabilities the laws of the State of Florida prohibit waiver and release by agreement.

**INDEMNIFICATION, HOLD HARMLESS AND DEFEND:**

The Consumer agrees to INDEMNIFY, HOLD HARMLESS and DEFEND SURF 9, LLC, a licensee of Body Glove IP Holdings LP, its employees, agents, attorneys, officers, subcontractors, manufacturers, from any loss, demand, damage, liability, judgments or costs, including attorneys fees and costs incurred, by reason of claims waived and released in the immediately foregoing paragraph entitled "WAIVER AND RELEASE OF LIABILITY" including Consumer's own negligence and use of the Product.

**JURISDICTION, APPLICABLE LAW AND BINDING EFFECT:**

Consumer expressly agrees that these Terms are intended to be as broad and inclusive as is permitted by the laws of the State of Florida. The courts of the State of Florida shall have exclusive jurisdiction as to all causes of action arising from the use of the Product or these Terms. If any portion of this Agreement is held to be invalid, it is agreed that the balance shall, notwithstanding, continue in full legal force and effect. Consumer agrees that these Terms shall bind the members of Consumer's family and spouse, if Consumer is alive, and Consumer's heirs, personal representative/executor and assigns if deceased.

IF YOU, THE CONSUMER, DO NOT AGREE TO ALL OF THE ABOVE TERMS, YOU MAY NOT USE THE PRODUCT AND SHOULD RETURN THE PRODUCT TO RETAILER FOR A COMPLETE REFUND OF THE PURCHASE PRICE.

Made in China  
Assembly required  
For outdoor use only  
Keep away from flame or direct heat source  
This is not a toy

# SETUP AND INFLATION

**STEP 1 :** Get started by registering your board with the manufacturer by visiting [registernyboard.com](http://registernyboard.com)

**IMPORTANT:** Your board comes with a clear dry pouch to store valuables while on the water. The manufacturer will not be held liable for valuables that are lost or damaged while using this item for any reason whatsoever.

**STEP 2 :** Open the box and unroll the board.

**STEP 3 :** To inflate, unscrew the valve cap from the valve, located on the tail of the board. The valve has two positions. The valve must be in inflation position to inflate, meaning that air can only move through the valve in one direction, into the board.

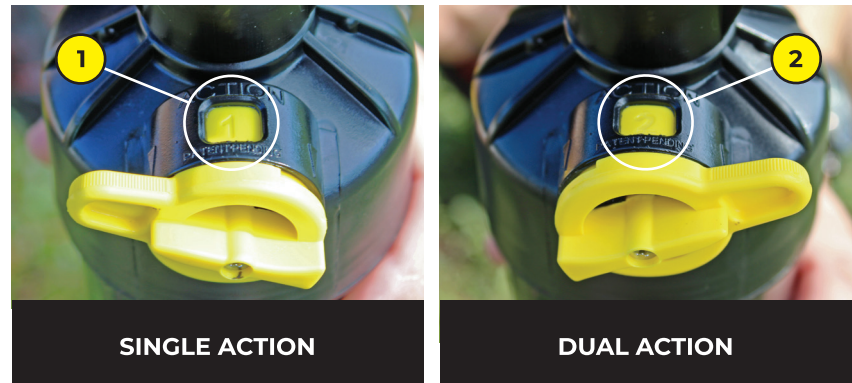

When the valve stem is in inflation position, the valve stem will stick up a little higher than in the deflate / two-way position. Push down on the valve stem once to switch between positions.

**STEP 4 :** Take the pump out and attach the hose to the pump handle. Make sure the hose is threaded onto the pump handle properly.

**STEP 5 :** Switch the pump from Single Action (1) to Dual Action (2) for quicker inflation of the board. The switch is located at the top of the pump cylinder. In this position the pump pushes air through the hose during both the downward push and upward pull.

**STEP 6 :** Connect the pump hose to the board. The valve stem should be up in the inflation position. Always make sure there is no sand or dirt in the end of your hose before connecting it to the valve on the board. Sand and dirt can cause the valve to stick or clog causing the board to lose air.

If the pump does not seem to be inflating, check the hose connection with the pump handle or valve.

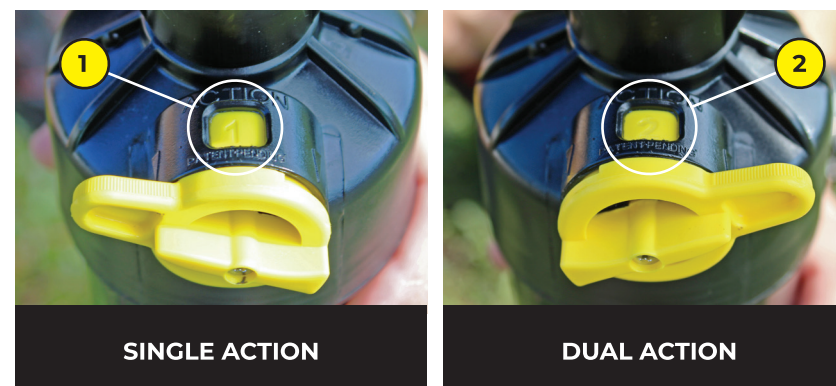

**STEP 7 :** Pump up the board with up and down motion of the pump handle.

**STEP 8 :** Once the board has taken shape and you begin to feel resistance from the pump, switch the lever from Dual Action (2) to Single Action (1). The switch is located at the top of the pump cylinder.

**IMPORTANT:** The needle on the pressure gauge will not move (register a pressure) until AFTER the board has taken shape.

**STEP 9 :** Continue to pump the board to 15 PSI (1 Bar), with 15 PSI (1 Bar) being maximum pressure.

**IMPORTANT:** Note that on the pressure gauge the yellow area indicates under inflation, the green area is target inflation range, and red area indicates over inflation.

## PADDLE & LEASH ASSEMBLY

**STEP 10 :** Assemble the paddle. Pull adjustment lock up to adjust the paddle to the desired length on the paddle shaft that contains user height and corresponding length options. Push adjustment lock back down to lock in place. Ensure that the pins of the paddle clip are fully engaged before using.

**NOTE:** Adjusting the height on the paddle on shore is always best. The clip needs only to be pulled up about 0.64 cm (0.25 in) to adjust. Completely removing the clip may cause damage to the clip and the paddle and can lead to the clip falling in the water and sinking.

**STEP 11 :** Unfasten the three layers of hook and loop at the end of the leash holding the string and remove it from the leash. Tie a slipknot around the D-ring on the tail of the board next to the inflation valve. Reattach the hook and loop on the leash through the slipknot of the string. Ensure that the hook and loop is properly fastened.

**STEP 12 :** It is recommended that you wear a Coast Guard approved personal flotation device (PFD). A PFD is a requirement in most jurisdictions.

**STEP 13 :** Remember to inspect the environment for safe paddling conditions.

## DEFLATION & PACKING

**STEP 1 :** Rinse off any sand or debris before storing the board, paddle, and accessories in the included storage backpack.

**STEP 2 :** Unscrew the valve cap and push the center of the valve stem to switch the valve back to two-way air flow. Air will now come out of the board rapidly.

With the valve in the deflation position, roll the board from nose to tail, forcing the air out of the board. Be sure to roll the board with the traction pad on the inside. Replace the valve cap once the rolling is complete and turn clockwise to tighten.

**STEP 3 :** Disassemble the paddle. Hold the middle shaft of the paddle with one hand and gently pull up on one of the adjustment clips with the other about 0.64 cm (0.25 in). Remove the blade and T-grip from the shaft.

**STEP 4 :** Store your paddle next to your board in the bag or roll the board around the 3 paddle pieces to protect your paddle during transport.

## FAQ – INFLATION / DEFLATION

ONE-WAY (INFLATION)

TWO-WAY (DEFLATION)

**Q : How does the valve work?**

**A :** The valve has two positions. The first is two-way which is for deflation only. The second is one-way which is for inflation only. To switch between positions, push the center of the valve stem down once. To switch again, push the center of the valve stem once more.

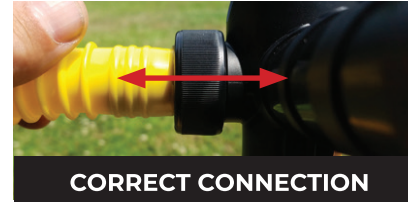

**Q : I just pumped my board and removed the hose, but now air is flowing out of my board. What do I do?**

**A :** Push the center of the valve stem once to switch the valve from two-way to one-way position. This makes it so that the air goes in and stays in. Once the valve is in the one-way position, you will need to repeat pumping to achieve target pressure.

## FAQ – PUMP

**Q : When I pump up the board the hose leaks. What should I do?**

**A :** Check the threaded connection of the pump hose where the hose connects to the pump handle. Make sure the connection is screwed on properly and is not cross-threaded. Inspect for any holes in the pump hose. If holes or cracks are found, contact our customer service.

CORRECT CONNECTION

INCORRECT CONNECTION

**Q : I cannot pull up on the pump to fully inflate the board. What should I do?**

**A :** The pump has the option to be a one-way pump and inflate the board on just the down stroke of pumping. This method requires less effort. To switch from Dual Action (2) to Single Action (1), turn the lever on the top of the pump cylinder to the left.

*Note the molded marking at the top of the pump cylinder showing the different pump modes.*

SINGLE ACTION

DUAL ACTION

**Q : Can I lubricate the gaskets in the pumps?**

**A :** If needed, you can use 5 ml (1 tsp) of silicone grease to lubricate the pump gasket inside the pump cylinder.

## FAQ – FINS

**Q : I lost the fin protectors. How do I get replacements?**

**A :** The fin protectors provided were for shipping from the factory to the customer. Fin protectors are not needed for storage.

**Q : Why does the board have fixed fins instead of removable fins?**

**A :** Fixed fins are more durable. A removable fin could get lost or broken.

**Q : Can I add a fin to the board?**

**A :** Adding a fin to the board is not needed for flatwater use or surfing. Adding a fin voids the warranty.

## FAQ – PADDLE

**Q : What is the height range for the person(s) using the adjustable paddle?**

**A :** The paddle can be adjusted for people between 1.5 m (5 ft 2 in) and 1.9 m (6 ft 5 in).

**Q : What should I do if the paddle clip comes off and how do I tell if it is broken?**

**A :** If the paddle locking clip comes off, you can line up the holes with the prongs and reinsert. If one or both of the prongs are missing, then a replacement clip(s) will be needed. Contact our customer service team for assistance.

**Q : Do I need to take off the paddle clip in order to adjust the length?**

**A :** When adjusting the paddle length, DO NOT completely remove the height adjustment clip from the paddle. Adjusting the height on the paddle on shore is always best. The clip needs only to be pulled up about 0.64 cm (0.25 in) to adjust. Completely removing the clip may cause damage to the clip and the paddle and can lead to the clip falling in the water and sinking.

**Q : I broke my paddle. What should I do?**

**A :** Purchase a new paddle or contact customer service. (See page 2 for customer service information).

## **FAQ – USE ON RIVERS**

---

**Q : Will rocks hurt the board?**

**A :** Bumping into / scraping over rocks will not typically damage your inflatable board; however, continuous scraping over time could lead to degradation and potential damage.

**Q : Can I use my board on a river and in rapids?**

**A :** This board is suitable for flatwater and river use. Proper training and knowledge are necessary for use in whitewater. Users should never attempt paddling / kayaking in swift currents without proper training.

## **FAQ – REPAIR & MAINTENANCE**

---

**Q : What items are in the repair kit and how do I use them?**

**A :** The included repair kit has the following items: wrench, PVC material and O-ring washer for the hose end of the pump. The wrench is used to adjust and / or replace the valve. Tightening and replacing the valve are not routine maintenance procedures. Please contact customer service for detailed instructions. Should your board develop a tear, we have included a piece of matching material. For small tears (less than 5.1 cm / 2 in) you can use PVC adhesive glue to affix the PVC material over the tear. For larger tears, you should get assistance from a local marine repair shop.

**A detailed protocol for repairing small tears can be found in the repair kit. Please note, glue is not included in the repair kit. Adhesive is not included due to the relatively short shelf life of this type of glue.**

**Q : When done using the paddle board, what should be done for both short-term and long-term storage?**

**A :** After each use, inspect the paddle board, in particular the valve area, and make sure that it is clean and free of any debris. Leaving the board inflated will not hurt the life span of the paddle board. However, the board should be stored in an area away from direct sunlight. Remember to check the pressure (15 PSI / 1 Bar) before using. It is recommended for extended storage (several months) that you deflate the board and store the paddle board in the enclosed backpack.

## **FAQ – TRANSPORT**

---

**Q : Can I take my board on airplanes?**

**A :** Yes, most airlines will allow you to check your inflatable board. Please note that the included backpack is too large for carry-on luggage. Make sure to check the airline's baggage policy before flying. Make sure to pack carefully so to lower the risk of damage to parts during transport.

**Q : Can I transport an inflated board on top of my car?**

**A :** Yes. You will need to securely attach the board with strong enough rope or cam straps to an approved vehicle car rack. Make sure the pressure of the board is at least 12 PSI (0.83 Bar) for "on car" transport and that the board is secured firmly.

**IMPORTANT: Failure to comply with the PSI or tie-down recommendations above may result in your board falling off your vehicle resulting in damage to your vehicle, your board and / or putting yourself and others in danger.**

**INCLUDED BACKPACK**

## **WARRANTY INFORMATION**

This product is warranted to be free from defects in materials and workmanship for a period of up to ONE year from purchase. If the product is defective, SURF 9 LLC, at its discretion will issue a new, like new, or similar model product excluding any shipping charges.

Warranty extends to original purchaser only and is nontransferable; sales receipt is required.

AUSTRALIA : Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.
